

All authors and readers of *Geospatial Health* are cordially invited to attend the:

4th International Symposium on Geospatial Health, with the theme “A One Health Approach in Geospatial Health” August 13-14, 2010, Melbourne, Australia

“A One Health Approach in Geospatial Health” will provide a forum on the relationship between health, humans, animals and the environment. The meeting will include invited speakers and the possibility to present results of submitted abstracts. The symposium is held prior to the XIIth International Congress of Parasitology (ICOPA), held in Melbourne, Australia, August 15-20, 2010. On Monday, August 16, 2010 GnosisGIS is responsible for a special ICOPA session entitled: “Geospatial Health: Predicting Distribution of Parasitic Diseases”. It is recommended that all GnosisGIS members attending our symposium on August 13 and 14, 2010 also come to this special event. The symposium will be organised in close collaboration with the School of Population Health, University of Queensland, Australia.

Local contact: Dr. Archie C.A. Clements
E-mail: a.clements@uq.edu.au

More information about the meeting, registration and abstract submission can be found at www.gnosisgis.org

REGISTRATION

Early Registration: by July 1, 2010 210 AUD
